

Candidate Statement for Vice-President of EUSEM

I am a Pediatric Emergency Physician, combining clinical practice, research, and education. Throughout my career, I have been committed to advancing Emergency Medicine through evidence-based education, international collaboration, and the development of innovative diagnostic and therapeutic approaches.

I have been a EUSEM member for years and contributed to making the pediatric section the first branch society of EUSEM. I currently hold the position of Vice-President. During this mandate, EUSEM has undergone important governance and strategic developments, to which I have actively contributed. I have also represented EUSEM within the European Trauma Course Organisation during a critical phase of organizational development and contributed to the revision of the ETC Manual. I am fully committed to serving EUSEM.

If re-elected, I would like to contribute to consolidating ongoing strategic initiatives, support the continued growth of Pediatric Emergency Medicine within EUSEM, and strengthen collaboration across sections, committees, and partner organizations. I believe EUSEM should continue to evolve as the leading European voice in Emergency Medicine, contributing to healthcare policy and strategic decisions at the European level. Finally, I would reinforce research as a core pillar of our Society by facilitating investigator engagement, collaborative research networks, and access to European research funding.

Niccolò Parri

A handwritten signature in black ink, appearing to read 'Niccolò Parri', written in a cursive style.
