PROUDLY PRESENT:

EMERGENCY MEDICINE CORE COMPETENCES COURSE

Developing competence in Emergency Medicine through
intensive simulation-training and group discussion.

23-25 September 2019
Stockholm, Sweden

This EMCC Course focuses on:

- The initial management of critically ill patients from all age groups
- Differential diagnosis and decision-making (with probability assessment, Bayes' theorem, test threshold, treatment threshold)
- ECG and acid-base interpretation
- Neurological evaluation
- Orthopedic evaluation
- Basic and advanced airway procedures and other relevant procedures in emergency medicine
- The difficult emergency delivery and newborn resuscitation
- Leadership and communication, including during a major Incident

All participants are invited to fill in a pretest as a theoretical preparation for the course.

All participants receive a course manual and pocket-sized checklist compendium covering:

- The initial management of > 30 critical syndromes
- The evaluation of patients presenting with one of 20 chief complaints
