KU LEUVEN

PROUDLY PRESENT:

**EMERGENCY
MEDICINE CORE
COMPETENCES
COURSE**

Developing competence in Emergency Medicine through intensive simulation-training and group discussion.

2-4 December 2019
Leuven, Belgium

This EMCC Course focuses on:

- the initial management of critically ill patients from all age groups
- differential diagnosis and decision-making (with probability assessment, Bayes' theorem, test threshold, treatment threshold)
- ECG and acid-base interpretation
- neurological evaluation
- orthopedic evaluation
- basic and advanced airway procedures, intraosseous needle insertion, lumbar puncture, finger thoracostomy
- the difficult emergency delivery and newborn resuscitation
- leadership and communication, including during a major incident

All participants are invited to fill in a pretest as a theoretical preparation for the course.

All participants receive a course manual and pocket-sized checklist compendium covering:

- the initial management of > 30 critical syndromes
- the evaluation of patients presenting with one of 20 chief complaints
