

Motivation letter

Emergency medicine has always been a huge fascination for me since my childhood. After graduating in medicine, I started specializing in emergency medicine with enthusiasm. Now I am at the end of my third year, and I find myself faced with numerous difficulties and wrong political choices which risk devaluing the role of the emergency medicine and lower the level of care we provide to people, in Italy, my country. This is why I decided to get involved and commit myself to recognizing the importance of emergency medicine. I am part of the coordinator of the Italian specialists in emergency medicine (Co.S.M.E.U) and I work with the other members to spread medical knowledge.

So, when I saw that eusem was looking for someone who wanted to become a congress track leader, I immediately thought it was an opportunity for me to make a difference and be useful.

I stand strongly that this position offers the perfect blend of experience so that it could be a rigid foundation on which my career may lie. With a burning desire to learn more and venture ahead in my favourite field, I apply for position of congress track leader that may ultimately stretch my passion of becoming an Emergency Doctor.

Best regards,

Laura Maria Tuccio
