Prof. Dr. med. Axel Radlach Pries

Dear Colleagues,

the X. Symposium on acute cardiology and emergency medicine will be held as “Charité meets FINLAND” addressing the actual questions of ongoing specialization and digital health and how this influences acute and emergency care.

Specifically, in rural areas, digital health solutions including remote patient management offer advantages which may also account for the unmet need of enough specialists in most emergency settings. Finland has an advanced Emergency Specialization, large rural areas and advanced digital solutions. We aim to discuss the clinical challenges, options and promises of digital health care solutions.

We bring together all new information in a thought provoking manner to stimulate both the audience and the speakers to have an inspiring and fruitful day.
