8th European Congress on Emergency Medicine

SUBJECT: EACCME accreditation granted EACCME-11071-G

We are pleased to inform you that your application for European accreditation for:

8th European Congress on Emergency Medicine

Venue: Amsterdam, Netherlands (28.09.–1.10.2014)

Event code: 11071

was granted **18** European CME credits (ECMEC) by the European Accreditation Council for Continuing Medical Education (EACCME).

European Accreditation

European Accreditation is granted by the EACCME in order to allow participants who attend the above-mentioned activity to validate their credits in their own country.

Accreditation Statement

Accreditation by the EACCME confers the right to place the following statement in all communication materials including the registration website, the event programme and the certificate of attendance. The following statements must be used without revision:

»The '8th European Congress on Emergency Medicine' (or '8th European Congress on Emergency Medicine' is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS), www.uems.net.«

»The '8th European Congress on Emergency Medicine' is designated for a maximum of (or 'for up to') 18 hours of European external CME credits. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.«

»Through an agreement between the European Union of Medical Specialists and the American Medical Association, physicians may convert EACCME credits to an equivalent number of AMA PRA Category 1 Credits™. Information on the process to convert EACCME credit to AMA credit can be found at www.ama-assn.org/go/internationalcme.«

»Live educational activities, occurring outside of Canada, recognized by the UEMS-EACCME for ECMEC credits are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of The Royal College of Physicians and Surgeons of Canada.«

EACCME credits

Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity. The EACCME credit system is based on 1 ECMEC per hour with a maximum of 3 ECMECs for half a day and 6 ECMECs for a full-day event.

Logo

The UEMS – EACCME logo is a service mark of the European Union of Medical Specialists – European Accreditation Council for CME. This service mark may be used publicly only with the permission of the UEMS – EACCME. The logo may only be used in conjunction with, and in proximity to, the EACCME accreditation statement. The logo cannot be used in notices, advertising, or promotion of activities other than in association with the EACCME accreditation statement.

Feedback report

The EACCME requires you to provide a feedback report of the event within four weeks of its completion together with a copy of the list of participants and the results of the individual feedback assessments by participants.

(EuSEM)

The European Society for Emergency Medicine is a non-profit making scientific organisation with an aim to promote and foster the concept, the philosophy and the art of Emergency Medicine throughout Europe. The main objective of EuSEM is to help and support European countries to implement the speciality of Emergency Medicine. Born as a society of individuals in 1994 from a multidisciplinary group of experts in Emergency Medicine, since 2005 EuSEM represents 27 European national societies of Emergency Medicine.

Our mission is to:

Promote and develop research, education, practice and standards of the speciality of Emergency Medicine throughout Europe.

Our goals are:

to foster and encourage education, training and research in Emergency Medicine in Europe to promote and facilitate the dissemination of information on Emergency Medicine, through congresses, courses, research and publications to encourage the development of uniform information systems and data banks in Emergency Medicine in Europe to encourage the formation and the cooperation between national associations for Emergency Medicine to promote international collaboration in the field of Emergency Medicine

The Netherlands Society of Emergency Medicine

NSEP was founded in 1999 and is the scientific society for emergency medicine in the Netherlands. NSEP represents both residents and consultants in emergency medicine and aims at improving quality and emancipation in emergency medicine.

The society organises annual scientific congresses and stimulates research in emergency medicine. The society is closely involved in the residency-training program and regularly develops professional and scientific guidelines to improve medical practice in emergency medicine.

NSEP is member of both the International Federation for Emergency Medicine (IFEM) and the European Society for Emergency Medicine (EuSEM) and works closely with EuSEM to harmonize European practices and promote emergency medicine as a specialty. One of the major goals for the next years is to extend the emergency medicine residency program in the Netherlands from three years to the European standard of five years.

// PRESIDENTS' WELCOME

Dear colleagues,

A very warm welcome to this exciting congress which takes place at a time emergency medicine is facing tough challenges across Europe. Working as a physician in an emergency department may give you the feeling you are in the middle of a storm of patients. It is our goal with this congress to help physicians deal with this storm.

Europe needs emergency medicine, as can be seen in the repeated rises in patient numbers being treated in Europe's emergency departments each year. In some areas, emergency departments now appear to provide the basic healthcare for their countries.

We in emergency medicine are one of the core essential services which are always there for our people: 24 hours a day, seven days a week, on holidays and at weekends. We must treat anyone, for almost any illness or injury, at any time.

The themes covered in this congress will help emergency physicians to provide the best medicine under these challenges. We have structured our themes according to the spirit of EuSEM: Global connections, international research, leadership and the desire to provide information hot off the press.

The congress will provide state of the art lectures covering such sectors as pre-hospital medicine, pulmonary and respiratory emergencies, toxicology, infectious diseases and sepsis, cardiovascular emergencies and neurological emergencies. Another major congress focus includes paediatric emergencies along with trauma, head and neck trauma and critical care, emergency care of the elderly and psychosocial emergencies.

As a scientific congress taking a wide view of emergency medical needs, this event also has as its keynote theme Connecting with Excellence. This desire to create new interfaces is illustrated in sessions including EuSEM meets the ESA, EuSEM meets the European Society for Cardiology and EuSEM meets the European Resuscitation Council.

We have a series of keynote and hot topic speakers with some of the most distinguished names in emergency medicine. Our colleagues in The Netherlands invite us to share their greatly-respected expertise in key emergency medicine sectors in their national track.

Administration tracks will provide help for management and organisation with themes including cost effectiveness and performance in the emergency department, quality of care, patient safety and risk management.

With EuSEM celebrating its 20th anniversary, we also look into the future with extensive research into emergency medical topics.

I am especially pleased that the EuSEM Young Emergency Doctors are taking a very active part in our congress. The EuSEM Young Emergency Doctors represent the future of European emergency medicine and they have shaped a large part of this congress with themes such as education after graduation, development in emergency specialty and education in emergency medicine.

Do not miss the great offer of important topics in the pre-courses, the keynote and hot topic speakers, the SIM War – the simulation competition – and the EBEEM prep course.

The beautiful and dynamic city Amsterdam, with its long tradition of global trade, is a marvellous setting for our congress.

I wish everyone a successful – and enjoyable – congress.

A handwritten signature in black ink that reads "B. Hogan".

Dr. Barbara Hogan, MBA, President EuSEM

GENERAL CONGRESS INFORMATION "A TO Z"

// ABSTRACTS

310 oral abstract presentations will be made in Amsterdam. Notifications regarding acceptance of abstracts were made in early July 2014. More than 750 posters will also be presented during the congress.

ABSTRACT NUMBERS

Abstracts presented in oral or poster sessions are numbered using their original abstract ID.

ABSTRACT PUBLICATION

The Top 10 scoring abstracts will be published in the European Journal of Emergency Medicine (EJEM). Abstracts will be considered for publication only if the author is registered for the Congress. Scores are determined per the review policies established by the EuSEM Abstract Review Committee.

ABSTRACT SYLLABUS

The oral and poster abstracts will be published on the EuSEM 2014 website prior to the Congress.

EPOSTERS (LOCATION, GUIDELINES)

See page 9

TOP SCORING ABSTRACTS

The Top 3 scoring abstracts are eligible for the "Best Research Abstract" award, and will present during the Awards Ceremony on Monday 29 September at 18:00. A small panel will judge the presentations, and a first place prize will be awarded to the top presenter, in the form of complimentary registration to the 2015 EuSEM Congress in Torino.

// ACCREDITATION

The 8th European Congress on Emergency Medicine was awarded 18 European CME credits (ECMEC) by the European Accreditation Council for Continuing Medical Education (EACCME).

// AWARDS

EUSEM YOUNG SCIENTIST AWARD

The EuSEM Young Scientist Award will also be presented at the Awards Ceremony, and delivered to the top scoring research abstract submitted to the category of Young Emergency Physician, whose lead author must be under the age of 35. This prize will consist of a complimentary registration to the 2015 EuSEM Congress in Torino and a one-year membership to EuSEM.

SOPHUS FALCK AWARD

This year, the Sophus Falck Foundation will award a prize to the best abstract submitted to the category of Pre-hospital Research. This abstract will also be presented at the Awards Ceremony.

// BADGES

Admission to EuSEM Congress scientific sessions is reserved for delegates only. Delegates receive a name badge with their registration materials. Badges should be worn at all times, as they will be used to control access to all EuSEM Congress sessions and activities. Exhibitor staff will be admitted to scientific sessions.

// CERTIFICATE OF ATTENDANCE

Certificates of attendance as well as EACCME credit certificates will not be handed out on site but will automatically be sent by email after the congress.

// CLOAKROOM

Saturday, 27 September: 8:00-18:00

Sunday, 28 September: 8:00-20:30

Monday, 29 September: 8:00-18:00

Tuesday, 30 September: 8:00-18:00

Wednesday, 1 October: 8:00-13:00

// CURRENCY

Euro (EUR) is the official currency. Banks and Currency Exchanges are widely available in Amsterdam.

// DATES

Pre-courses are scheduled on Saturday, 27 and Sunday, 28 September 2014. The congress will officially open on Sunday, 28 September 2014.

// DINING

Various restaurants are located in the immediate vicinity of the congress venue for your lunch or dinner. No lunches will be served during the congress.

// EVALUATION

The congress evaluation and feedback form will be available onsite from Sunday, 28 September 2014. It will only be available to EuSEM registered participants. We kindly remind you that this evaluation form is mandatory to receive your EACCME certificate. We appreciate feedback about your experience at the Congress. Your input is essential in planning future EuSEM activities.

// EXHIBITION HALL

The exhibition hall will be open during the following hours:

Sunday, 28 September: 13:00 - 20:00

Monday, 29 September: 9:00 - 19:00

Tuesday, 10 September: 9:00 - 18:00

Wednesday, 11 September: 9:00 - 13:15

// LANGUAGE

The official language of the EuSEM Congress is English.

// INDUSTRY-SPONSORED WORKSHOPS & SYMPOSIA

The industrial partners to the congress will hold workshops and symposia on 29 & 30 September. Registrations can be made onsite with the organising companies, subject to availabilities.

// SPEAKER PREVIEW ROOM

Speakers are REQUIRED to upload their presentation(s) in the preview room immediately upon arrival, after retrieving your speaker badge. The preview room is located in the Gashouder. Computers will be available for speakers who need to check their presentations or make last-minute updates. May we remind you that the only authorised media is PC or Mac video projection.

// REGISTRATION

The registration desk will be open during the following hours:

Saturday, 27 September: 8:00-18:00

Sunday, 28 September: 8:00-18:00

Monday, 29 September: 8:00-18:00

// NEW THIS YEAR FOR EUSEM E POSTERS

ePoster stands for "electronic poster". Attendees of the Congress can view their ePoster on designated viewing screens. The advantage of this system is that you can show a lot more information than on classic paper posters. Poster presenters no longer have to pay to have their paper posters printed, and they no longer have to travel with cumbersome poster tubes.

This year, e-Posters have completely replaced the printed posters and the Organising Committee is sure that you will share their enthusiasm for this innovative approach. This system has been introduced to a number of scientific and medical conferences in recent years, as a digital alternative to paper.

This year, ePosters will be a single slide PowerPoint presentation, in a "landscape" format. They will be displayed on 15 giant LCD screens, using tactile features. Authors were requested to send their ePosters before 25 September 2014 to our Technical Team as it will not be possible to submit them onsite.

Location and presentation

ePosters will be displayed during the whole congress, from Sunday 28 September (12:00) until Wednesday 1 October (13:00) on 15 horizontal giant LCD screens, in the ePoster area (**Gashouder Exhibition area**).

There will be no specific time allotted to ePoster presentations.

Participants will be able to watch the eposters freely on the LCD screens, and browse them using a tactile user interface.

Poster dimensions

Your ePoster is a single slide Powerpoint file

The ePoster dimensions are 132cm in width and 75cm in height.

The ePosters will be displayed in a "landscape" format.

For any request about the ePoster format and display, you may send an email to: eposters@eusem2014.org

// SIMWAR - SIMULATION COMPETITION

Session chairs: François Lecomte (France), Youri Yordanov (France)

Coordinators: Abdo Khoury (France), Luca Carengo (Italy)

Faculty: Karim Benmiloud (Switzerland), Erik Dol (The Netherlands), Ismael Hussain (France), Patrick Plaisance (France), Thomas Plappert (Germany), Pieter Jan Van Asbroeck (Belgium), Mieke Willemsen (The Netherlands), Sabina Zadel (Slovenia)

Introduction: The simulation war is an event where emergency medicine teams (In-hospital or Pre-hospital teams) from different countries will be able to compete against each other in a friendly fashion, using the best quality high fidelity patient simulators (mannikins). This competition will be held during the Congress on Monday & Tuesday, and will require from the teams to take part in ALL scenarios.

The competing teams will have to deal with various emergency clinical situations including adult and/or paediatric medicine, trauma and psychiatry. Standard ED or ambulance material will be provided and should be used by the participating teams.

Independent judges will evaluate the teams' performances. The winning team is the one that achieves the highest scores. Awards will be given to the first 3 teams.

Ground Rules:

- A team should include paramedics, nurses, and/or physicians according to national rules (usually 3-4 members). We stress the importance of multidisciplinary teams including junior doctor or residents.
- All team members should be registered in the conference to be able to compete.
- Time allocated to each scenario will be variable according to the numbers of teams registered. It begins once the team members approach the patient.
- Positive points will be used for the evaluation of the scenarios
- Treat all scenarios as real!

Registration: To register, download (www.eusem2014.org) the form below and return it to audrey.martin@mcocongres.com

Deadline for registrations: Friday 12 September 2014

Keynote Session 1: Going beyond one-size-fits-all ACLS to patient-centered resuscitation

September 29, 2014 - 09:00:00 / 09:45:00 - Zuiveringshal West

Current ILCOR guidelines suggest a common treatment algorithm that is the same for all patients in cardiac arrest. While these guidelines are useful as a starting point for treatment, an unanswered question remains on whether a patient-centered resuscitation strategy would save more lives. A patient-centered approach to resuscitation would customize the elements of resuscitation like compressions rate, depth, ventilation, and drugs to the physiology of the individual patient. A hierarchy of patient-centered sensors and therapies will be discussed that represent a paradigm shift for resuscitation.

Lance Becker, MD, Professor of Emergency Medicine and Director, Center for Resuscitation Science, has research interests that are translational and extend across the basic science laboratory into animal models of resuscitation and to human therapies. He has been a leader in the field of resuscitation for over 25 years, pioneering advances in improving the quality of CPR, AED use, defining the "three phase" phase model for cardiac arrest care, and therapeutic hypothermia. He has worked closely with the American Heart Association in emphasizing the importance of a "systems of care" approach to improving survival within communities. The systems of care approach represents a major shift in philosophy as it includes bundles of care, multiple interventions, and relies on the measurement of good outcome metrics like the community survival rate to drive the system to better survival rates. He is also an active basic science researcher with a particular interest in the role of mitochondria in "life-versus-death decision making" for cells and tissues exposed to and recovering from ischemia. He founded and directs the Center for Resuscitation Science which bring investigators from diverse fields together for resuscitation research and improved training of young scientists.

His cellular studies have helped define reperfusion injury mechanisms, mitochondrial oxidant generation, reactive oxygen and nitrogen species responses to ischemia, apoptotic activation following ischemia, signaling pathways, new cellular cytoprotective strategies and hypothermia protection. Additional new studies are ongoing on development of novel human coolants for rapid induction of hypothermia, inflammatory pathways activated following shock and cardiac arrest, improving the quality of CPR, new defibrillator and cardiopulmonary bypass technologies, epidemiology of sudden death, and novel treatments for cardiac arrest.

Keynote Session 2: When do we know that emergency care is quality care?

September 29, 2014 - 09:45:00 / 10:15:00 - Zuiveringshal West

The Emergency Department is the "front door" of the hospital and results in more complaints, litigation and safety concerns than other departments. Internationally, there has been little consensus on what represents a high quality and safe ED, yet we all hope that we work in one! Developing metrics that show us the state of our EDs is important as we strive for perfection - but what does perfection look like?

Professor Peter Cameron is Chair of Emergency Medicine at Hamad Medical Corporation in Qatar, Immediate Past President of the International Federation for Emergency Medicine and Professor of Emergency Medicine at Monash University and The Alfred Hospital, Melbourne Australia.

He has been extensively involved in developing quality metrics in Emergency Medicine at both a national and international level.

Ruling out acute myocardial infarction within 1 hour: first results from an international, multi-centre study

September 29, 2014 - 10:45:00 / 12:30:00 - Zuiveringshal West

Appointed to associated professor at the Department for Clinical Outcome Research Cardiology at the Medical Faculty of the Basel University in 2011, Prof. Christian Mueller is also Chief Practitioner and Department Chief at the University Hospital's Cardiological Clinic. Mueller has been working in this department since 2004. Born in 1968 in Augsburg, Germany, he studied and graduated in Munich. Christian Mueller's main research areas are especially related to the early diagnosis and the initial therapy of acute myocardial infarcts and acute heart failure. He has received various scientific awards in Intensive Care and Cardiology.

Sepsis - ProCESS - implications for ED sepsis management.

October 1, 2014 - 09:30:00 / 11:00:00 - Zuiveringshal West

This presentation will discuss the background, design, and results of the ProCESS trial, and implications for ED sepsis management.

Dr. Huang trained in Emergency Medicine at Henry Ford Hospital, followed by a CCM Fellowship, NIH Research Fellowship, and MPH at the University of Pittsburgh. He is a Fellow of the American College of Emergency Physicians and the American College of Critical Care Medicine. He is a Core Faculty member of the CRISMA Center, Associate Director of the Abdominal Organ Transplant ICU, and Director of MACRO.

His research focuses on organizational safety culture and patient outcome, biomarkers and resuscitation of infection and sepsis, and EM-CCM physician demographics and education.

Dr Huang was Medical Monitor for the ProCESS trial

// THE CONGRESS

The 8th European Congress on Emergency Medicine will take place in Amsterdam, Netherlands, in the 'Westergasfabriek'.

The congress is organised on behalf of the European Society for Emergency Medicine (EuSEM) and the Netherlands Society of Emergency Medicine (NSEP).

This year's main theme is 'Connecting for Excellence'. Like the merchants from Amsterdam who made the city rich by reaching out to the world, we must also look beyond our own countries. We must be open to new ideas and seek new knowledge to find new answers and the congress will be a great opportunity for delegates to connect with fellow practitioners in Emergency Medicine.

// LEARNING OBJECTIVES

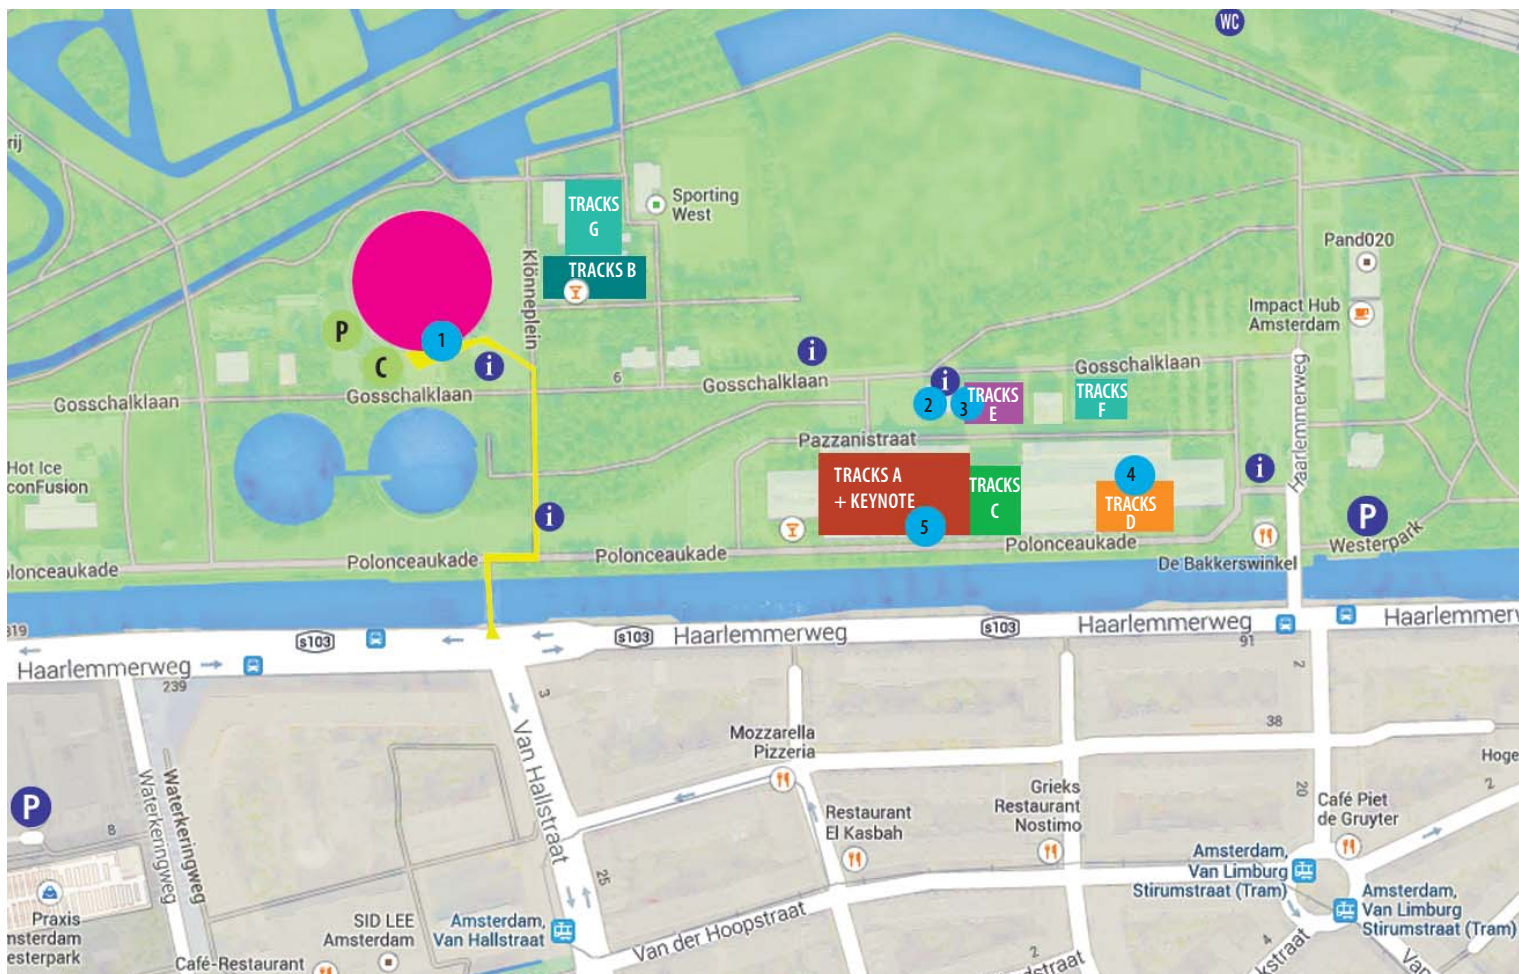

The programme includes hand-picked leading international experts who have contributed valuable recent research in Emergency Medicine internationally. From previous congresses, delegates wish to have concise updates for effective and efficient clinical practice in modern emergency departments and in the pre-hospital setting. The congress will deliver sessions to satisfy those demands and give extensive Emergency Medicine knowledge for use in the clinical setting. The congress will give delegates a greater understanding of the development and progress of EM in Europe from an international viewpoint.

The overall objective is the advancement of international emergency medical services and education in Europe in particular - and the world in general.

Other learning objectives include:

- Describing the history of development of emergency medicine as a speciality and its status in various European nations.
- Comprehending the diversity of the scope of practice and clinical privileges for which emergency medicine specialists are certified and expected to provide.
- Contrasting the general principles of treating common emergencies such as resuscitation, cardiovascular and respiratory complaints, paediatric patients and trauma management.
- Utilising general principles of disaster and pre-hospital care and the basic principles of triage and stabilisation.
- Assimilating general research principles from the oral and poster sessions of new research presented by attendees.

PC1 - ENHANCING SURGE CAPACITY: RISK MANAGEMENT & BUSINESS CONTINUITY PLAN

Saturday 27 September: 9:00 - 17:30 - Transformatorhuis

Course Directors: Steve Photiou (Italy), Alessandra Revello (Italy)

Faculty: Luc Mortelmans (Belgium), Abdo Khoury (France), Ahmad Reza Djalali (Italy)

Schedule

- 09:00 Introduction & presentation of the Workshop
"It's all question of Surge Capacity"
- 09:45 Risk Management steps
 - Business impact analysis
 - Threat and Risk analysis
 - Threat analysis (external)
 - Hazard analysis (internal)
 - Vulnerability analysis
- SWOT (strengths, weaknesses, opportunities, threats)
- Risk options, risk management, positive risk management
- 11:00 Coffee Break
- 11:15 Risk communication
Impact scenarios: Recovery requirements and Solutions
Testing & Implementation, Exercise & Maintenance

- 12:00 Special Issues:
 - Modulability
 - Stringent finances and Allocation of resources
 - "Overkill": the concept of redundance
- RM/BCP in Healthcare Systems: Hospital Disaster Preparedness (HDP)

- 13:00 Lunch
- 13:45 Hands-on Disaster Drill
- 15:15 Coffee Break

PC2 - FALCK FOUNDATION PREHOSPITAL RESEARCH WORKSHOP

Saturday 27 September: 08:30 - 16:30 - MC Theatre room

Course Directors: Rune Andersen (Denmark)

Faculty: Maaret Castrén (Sweden), Jana Séblova (Czech Republic), Joost Bierens (Netherlands)
V. Anantharaman (Singapore), Olivier Hoogmartens (Belgium)

Individual assignment before seminar

1. Create a new prehospital research proposal, or use your current prehospital research proposal
2. During the workshop there will be time available to prepare and/or discuss your prehospital research proposal in group
3. Each attendee will be asked to actively participate in the group discussions

Course description

After 5 introductory presentations by experts with experiences in prehospital research, the participants of the workshop will be separated in distinct groups. Participants introduce their own current version of a research proposal by which is then discussed with the researchers, group and in the plenary session. The goal of the interactive workshop is to learn the most important elements that contribute to good quality and successful prehospital research. The goal is not that the research proposals will be executed, although further initiatives to do so will be applauded.

Learning objectives

Research in the prehospital domain of emergency medicine is scarce. It is well-known that such research is difficult to prepare, execute and publish in high impact journals. It is not uncommon that a young and dedicated researcher has the intention to start an interesting study and discover the hard way that the study cannot be completed successfully. At the same time, such prehospital research is needed to further improve the quality and effectively of current pre-hospital treatments. The pre-conference workshop on prehospital research aims at gathering around the table practitioners seeking to improve their scientific research skills and in this way are able to contribute to improved pre-hospital emergency health care. The learning outcomes when participating in this workshop is: to create a sound prehospital research proposal.

Schedule

- 08.30 Welcome and introduction on the prehospital research workshop
- 08.45 Prehospital Study Designs and Methodology
- 09.15 Rookie Mistakes and Pitfalls in prehospital Research
- 09.45 Coffee break
- 10.00 Ethics in pre-hospital research
- 10.30 Why is Prehospital Research so Difficult?
- 11:00 Prehospital Research Proposal
- 11.30 Instructions
- 11.45 Prehospital Research Proposal
- 12.30 Lunch break
- 13.15 Prehospital Research Proposal (cnt.)
- 15.30 Brief presentation of research proposals
- 16:00 Wrap up and evaluation

PC3 - NON-INVASIVE VENTILATION PRE-COURSE

Saturday 27 September: 9:00 - 17:00 - Small Studio room

Course Director: Roberto Cosentini (Italy), Paolo Groff (Italy)

Faculty: Anna Maria Brambilla (Italy), Abdo Khoury (France), Roberta Petrino (Italy)

Schedule

- 09:00 How I treat hypoxemic patients: Acute Cardiogenic Pulmonary Edema (ACPE):
 - clinical cases
 - pathophysiology & literature
 - How I use CPAP
- 10:00 Pneumonia:
 - clinical cases
 - pathophysiology & literature
- 10:45 Coffee break
- 11:00 - CPAP hands-on.
- 12:00 Lunch break
- 13:00 How I treat hypercapnic patients: COPD exacerbation:
 - clinical cases
 - pathophysiology & literature
- 13:45 - ventilators & ventilation
- 14:45 Coffee break
- 15:00 - NIV hands-on
- 17:00 End of course

PC4 - ULTRASOUND BEGINNER PRE-COURSE

Saturday 27 September: 08:00 - 17:30 - Openbare Verlichting room

Sunday 28 September: 08:00 - 12:00 - Openbare Verlichting room

Course Director: James Connolly (UK)

Faculty: Nasim Azizi (The Netherlands), Ingvar Berg (The Netherlands), Marco Bijvoet (The Netherlands), Tom Boeije (The Netherlands), James Connolly (UK), Pasha Farooq (Saudi Arabia), Rip Gangahar (UK), Adela Golea (Romania), Beatrice Hoffman (USA), Costas Kaiafas (USA), Christofer Muhr (Sweden), Joseph Osterwalder (Australia), Paul van Overbeeke (UK), Nils Oveland (Norway), Vincent Rietveld (The Netherlands), Arthur Rosendaal (The Netherlands), Titus Schonberger (The Netherlands), Prem Sukul (The Netherlands), Maxime Valois (Canada), Gabriele Via (Italy), Joseph Woods (USA)

Participants

44 physicians

Course description

This is a course applicable to all from the very beginner to those with some experience. It is an opportunity to learn and develop basic skills with an internationally renowned faculty.

Learning objectives

- Develop basic skills and knowledge Learn how to develop Ultrasound in your institution and personal practice Techniques of basic US approach to limbs, chest, heart, abdomen
- Recognition of basic US pathology
- Basic US approach to cardiac arrest, shock, respiratory failure
- Recognition of basic images and US artefacts

Educational Objectives

Applicable to all levels of Emergency Practitioner, including paramedical staff High ratio of supervision to ensure maximum hands on Develop basic skills and knowledge Learn how to develop Ultrasound in your institution and personal practice

Schedule

DAY 1 27 September

- 08:00 Introduction. James Connolly (UK)
- 08:20 Basic Physics. Rip Gangahar (UK)
- 08:40 Practical - Machine familiarisation
- Time to get familiar with all machines, settings and artefacts. Maxime Valois (Canada)
- 09:10 Airway and Breathing. Nils Oveland (Norway)
- 10:00 Coffee break
- 10:20 Circulatory 1 - FAST. Vincent Rietveld (The Netherlands)
- 11:20 Circulatory 2 Aorta /IVC. Adela Golea (Romania)
- 12:20 Lunch
- 13:00 Cardiac Images. Gabriele Via (Italy)
- 13:30 Shock Scanning and Cardiac Arrest. James Connolly (UK), Maxime Valois (Canada)
- 14:00 Practical Scanning Cardiac Session1. Christofer Muhr (Sweden)
- 14:45 Practical Scanning Cardiac Session2. Christofer Muhr (Sweden)
- 15:30 Coffee break
- 15:50 Assessment of D - Beatrice Hoffman (USA)
- 16:10 Interactive Cases - Introducing the modality. Joseph Wood (USA)

DAY 2 28 September

- 08:00 Scanning Session. Nasim Azizi (The Netherlands), Ingvar Berg (The Netherlands), Marco Bijvoet (The Netherlands), Tom Boeije (The Netherlands), Costas Kaiafas (USA), Paul van Overbeeke (UK), Arthur Rosendaal (The Netherlands), Titus Schonberger (The Netherlands), Prem Sukul (The Netherlands)

PC5 - ULTRASOUND ADVANCED PRE-COURSE

Saturday 27 September: 08:30 - 18:00

Sunday 28 September: 08:30 - 12:30 - Machinegebouw room

Course Director: Mike Lambert (USA), Hein Lamprecht (South Africa)

Faculty: Zeki Atesli (UK), Raoul Breikreutz (Germany), Gian Cibinel (Italy), Pasha Farooq (Saudi Arabia), Katarzyna Hampton (USA), Hani Hariri (Saudi Arabia), Beatrice Hoffman (USA), Bob Jarman (UK), Jean Francois Lanctot (Canada), Christofer Muhr (Sweden), Joseph Osterwalder (Switzerland), Nils Oveland (Norway), Maxime Valois (Canada), Gabriele Via (Italy), Joseph Wood (USA)

Participants

60 physicians in 12 groups

Requirements

English speaking participants, basic US experience and/or previous participation in a basic emergency US course, ALS/ACLS/ATLS certification recommended.

Course description

2-days emergency ultrasound advanced course: lectures, organ based hands-on practice, simulated clinical scenarios.

Learning objectives

- Technique: advanced US approach to head, neck, limbs, chest, heart, abdomen
- Recognition of advanced US syndromes
- US enhanced advanced management of critical syndromes: cardiac arrest, shock, respiratory failure, acute abdomen, coma

Schedule

DAY 1 27 September

08:00 Introduction. Mike Lambert (USA) Gian Cibinel (Italy)

08:20 Basic to Advanced Physics. Robert Jarman (UK)

PC6 - PRE-CONGRESS COURSE ON EMERGENCY DEPARTMENT ADMINISTRATION

Saturday 27 September: 08:00 - 17:30 - Ketelhuis room

Course Director

Philip Anderson (USA), Eric Revue (France)

Faculty: Stephanie Kayden (USA), Robert Freitas (USA)

Course description & learning objectives

Background:

Performance and Quality Improvement are among the central administrative challenges facing Emergency Department leaders in all countries. Through a series of lectures and workshops facilitated by experienced faculty, course participants will learn practical approaches for improving performance and quality in their emergency departments. Participants will work together in small groups on concrete problem solving projects designed to produce concrete tools and strategies that can be implemented in the participants' home institution.

This course is being organized by the International Emergency Department Leadership Institute (IEDLI) www.iedli.org

Learning objectives: At the completion of the course, participants will be able:

- To define quality as it relates to care delivery in the emergency department and discuss key metrics and performance indicators for measuring quality
- To describe the main theories of overcrowding in emergency departments and discuss strategies for mitigating overcrowding
- To discuss the difference between practice guidelines and clinical pathways and identify the key elements of clinical pathways that increase likelihood for success
- To describe the key elements of risk management strategies for responding to errors and adverse events in the emergency department.

A full course agenda is provided below.

Schedule

08:30 Introduction

08:45 Lecture 1 Quality Assurance / Improvement. Philip Anderson (USA)

09:30 Lecture 2 Overcrowding. Eric Revue (France)

PC7- ADVANCED PAEDIATRIC EMERGENCY CARE (APEC)

Saturday 27 September: 08:30 - 17:00 - Big Studio room

Sunday 28 September: 08:30 - 13:30 - Big Studio room

Course Director: Yehezkel Waisman (Israel), Said Hachimi Idrissi (Belgium),
Faculty: Silvia Bressan (Italy), Nadeem Quereshi (USA), Said Hachimi Idrissi (Belgium), Liviana da Dalt (Italy), Santiago Mintegui (Spain), Tom Beattie (UK), Itai Shavit (Israel)

Participants

The course is designed for 30 participants (skill stations and case scenarios will be conducted in small groups). More specifically, it is designed for PEM Physicians, Paediatricians, and Emergency Physicians who provide care for children in emergencies and who want to refine their knowledge and skills in PEM.

Course description & learning objectives

Background: The APEC course is a development of the Paediatric Section at EuSEM, and will be conducted by its faculty members. At the end of the course participants will be presented with certificates of course completion by EuSEM.

Objectives: To provide physicians participating in the course with both knowledge and advanced skills in recognizing and managing a wide spectrum of paediatric emergencies including trauma, both in the hospital and pre-hospital settings.

General Outline: A two-day course.

During the morning hours of both days, lectures will be presented on the management of a wide spectrum of paediatric emergencies (including trauma) with emphasis on evidence-based literature. During the afternoon hours of day 1, students will actively participate (hands-on) in advanced skill stations designed to provide knowledge and skills relevant to paediatric emergency medicine. During the afternoon of day 2, students will participate in small group discussions / cases simulations designed to elicit discussion on the clinical management of common paediatric emergencies including trauma.

A full course agenda is provided below.

Schedule

DAY 1 27 September

- 08:30 Registration/Buffer
- 09:00 Introduction to the APEC course
- 09:15 An Approach to the Seriously Ill Infant and Child. Said Hachimi Idrissi, Belgium
- 09:45 Principles of Pediatric Triage. Yehezkel Hezi Waisman, Israel
- 10:15 Respiratory Emergencies. Silvia Bressan, Italy
- 10:45 Coffee break
- 11:15 Management of the Febrile Child in the ED. Silvia Bressan, Italy
- 11:45 Status Epilepticus (SE). Nadeem Quereshi, USA
- 12:15 Abdominal Emergencies. Liviana da Dalt, Italy
- 12:45 Common Toxicological Emergencies. Santiago Mintegui, Spain
- 13:15 Lunch Break
- 14:00 Case Scenarios (Simulations) Respiratory Cases. Silvia Bressan, Italy
- 14:45 Shock (2-3). Yehezkel Hezi Waisman, Israel
- 15:30 Cardiac Cases & Pediatric Arrhythmias (3). Said Hachimi Idrissi, Belgium
- 16:15 Trauma Cases (2-3). Itai Shavit, Israel

DAY 2 28 September

- 08:30 Buffet
- 09:00 Introduction to day 2
- 09:15 Approach to the Pediatric Multiple Trauma Patient. Tom Beattie, UK
- 10:00 Cardiovascular Emergencies. Said Hachimi Idrissi, Belgium
- 10:30 Diabetic Keto-Acidosis. Nadeem Quereshi, USA
- 11:00 Coffee break
- 11:30 Procedural Sedation & Analgesia. Itai Shavit, Israel
- 12:15 Pediatric Orthopedic Emergencies. Tom Beattie, UK

PC8- AIRWAY WORKSHOP

Sunday 28 September: 08:00 - 12:00 - MC Theatre room

Course Director: Sabine Merz (Germany)

Faculty: Christian Hohenstein (Germany), Bernhard Kumle (Germany)

Participants

The course is designed for 30 participants (skill stations and case scenarios will be conducted in small groups).

Course description & learning objectives

Airway Management is a major topic in the Emergency Department. Knowledge of the different devices and techniques is necessary in order to practice safe Airway Management for the patient. The course will give an overview of the frequency and the management of difficult airways in the Emergency Department. Several techniques will be taught by experienced ED physicians and all participants will be able to train the different devices on intubation trainers.

PC9 - 2014 EBEM PREPARATION COURSE, PART A/B

Saturday 27 September: 09:00 - 18:00 - Westerliefde room

Sunday 28 September: 09:00 - 12:30 - Westerliefde room

Course Director: Roberta Petrino and Ruth Brown

Faculty: Ashraf Butt, Cristian Boeriu, Roberto Cosentini, Kevin Enright, Cornelia Hartel, Sabine Lemoyne, Riccardo Pini, Serra Pitts, Anna Spiteri, Ian Stell

Schedule

DAY 1 27 September

Part A preparation: interactive MCQ sessions, using questions based on the curriculum. Allows candidates to prepare for the type of questions they should expect on the exam, as well as practice subjects that are less common.

DAY 2 28 September

Part B preparation: interactive OSCE workshop, allowing candidates to see how this portion of the exam is run, how stations are marked, and what is expected in order to pass. Candidates will have an opportunity to try clinical scenario and viva stations.

The Morgan Lens for Emergency Ocular Irrigation

Patient enters,
eyes inflamed.

The Morgan Lens
is inserted.

In less than 20 seconds
irrigation is underway,
and your hands are
free to help elsewhere.

Only with the Morgan Lens:

- “Hands-free” ocular irrigation – frees staff
- Effectively removes chemicals or non-embedded foreign bodies
- 100% of solution treats the eye – no pooling
- Eliminates blinking reflex
- Patient may be transported without stopping irrigation
- Patient rests comfortably with eyes closed

**Fast, comfortable, and effective—
there’s a reason 95% of the hospitals
in the USA use the Morgan Lens.**

Accelerating Patient Care Decision-Making

i-STAT®

For In Vitro Diagnostic Use only

© Abbott Point of Care Inc.
www.abbottpointofcare.com

i-STAT is a registered trademark of Abbott Laboratories.

The i-STAT® System plays a key role in the patient care continuum. Giving clinicians the critical test results they need, within minutes at the bedside of their patients.

Emergency department physicians can receive cardiac and electrolyte levels to assess the status of their patients fast. In a surgical ICU, a respiratory therapist can quickly evaluate a patient's oxygenation and ventilation status to promote and effect efficient ventilator weaning. And in the operating suite, a perfusionist can assess vital hemostasis and coagulation status while maintaining focus on the patient during a complex procedure.

Accelerating the patient care decision-making process not only improves patient care, it also helps to increase system efficiency throughout the hospital, while supporting quality and compliance initiatives. To learn more, visit www.abbottpointofcare.com

Because every minute counts.
